1A1-1 Empower™ MP Foot

The Empower replaces the function and power of lost muscles and tendons, giving users energy rather than taking it away – even up ramps, hills, and stairs. Its powered propulsion drives the user forward and upward while smoothly transitioning weight to the remaining limb. The Empower provides the required amount of energy needed for each step, enabling users to cope effortlessly with longer distances, stairs, and sloping terrain.
Reclaim your power.

**Power**
- Emulates the function and power of lost muscles and tendons
- Provides energy instead of taking it away, even up ramps, hills, and stairs

**Control**
- Lifelike ankle movement that normalizes user’s walking gait
- Reduces joint forces that may result in less pain and fewer long-term orthopedic problems

**Stability**
- Adjusts ankle power, resistance, and flexion in real-time
- Provides balance on variable terrain
