Clinical studies confirm the difference

More than 69 studies with over 3,000 test subjects scientifically confirm what users and technicians have experienced with more than 75,000 C-Leg fittings around the world.

95% of trialled practitioners would recommend a C-Leg 4 to their patients to replace their previous prosthesis.

94% of trialled amputees preferred C-Leg 4 over their previous prosthesis.

Several international studies confirm the cost-effectiveness of the C-Leg compared to a mechanical knee prosthesis.

94% of patients reported being very satisfied or satisfied with C-Leg 4. No patients reported being unsatisfied.

90% of users feel safer with the C-Leg compared with a mechanical prosthesis.

The number of falls was reduced by 64% with the C-Leg compared with a mechanical knee prosthesis.

50% of K2 patients fitted with a mechanical knee improved to K3 when transitioned into a C-Leg.

Cost effectiveness studies confirm a 29% or greater reduction in cost per Quality Adjusted Life Year (QALY) compared to mechanical knees.

References
Benefits

- Reliable stance and swing phase control in real time on various surfaces
- Choice between Intuitive and Manual Stance
- Safe backward walking
- Active Stumble Recovery at all times
- Cockpit app for Android and iOS devices*
- C-Soft Plus adjustment software with video tutorials supports the fitting process (version 1.6 and up)
- Large selection of compatible feet
- Weatherproof with IP67
- Two MyModes

New C-Leg 4: What you need to know

- Product reference numbers (3C98-3*, 3C88-3*) remain the same
- No recertification necessary
- Update of C-Soft Plus to version 1.6 (4X440=V1.6) required
- New Cockpit app available in the Google Play Store (Android) and Apple App Store (iOS)*
- Remote control (4X350) cannot be used for iOS-compatible C-Leg

For more information, see the instructions for use or the new C-Soft Plus version 1.6.

*Apple iOS compatibility is available with the new C-Leg 4 only. iOS compatibility is not available with previous versions of the C-Leg 4.
